

Nicolas Glesel

Open information. Real-world impact.

I show what open information reveals about people and organisations. My talks connect OSINT and digital security with the questions your audience faces in practice.

A STARTING POINT FOR YOUR PROGRAMME

Open data, real threats

How digital traces enable credible attacks and where prevention can make a difference.

Real or manipulated?

Deepfakes, disinformation and a clear process for checking what you see.

OSINT for better decisions

What open sources can tell us, how I assess findings and where the limits lie.

Have another topic in mind? I adapt the content, examples and level of detail to your occasion and audience.

SELECTED EVENTS

Digital Investigations Conference Zurich and Vienna · Magnet Germany Summit · Industrieclub Sachsen · European Police Congress

Your audience gains a clear understanding of digital risks and practical ideas for their own work. I explain the methods behind the findings and their limits.

FOR YOUR AUDIENCE

Leadership, security teams, public authorities and administration, as well as specialist and industry events.

PLANNED TOGETHER

Keynote, talk or executive briefing. Usually 20-90 minutes, with time for questions by arrangement.

Based in Berlin, available internationally. German or English. On site, online or hybrid.

PROFESSIONAL BACKGROUND

GIAC Open Source Intelligence (GOSI): certification.

SANS SEC497: completed training.

Let's talk about your event.
