EVENT PLANNING 2027

Nicolas Glesel

OSINT expert, speaker and trainer

Understand open information.
Assess digital risks.

I connect OSINT, artificial intelligence and corporate security through clear methods and realistic examples.

Photo: Tolga Manasirli

Topics for your programme

OSINT: open information, real risks

Understand digital traces and approach security questions systematically.

AI meets OSINT

Support research and analysis while checking sources, hallucinations and human judgement.

Deepfakes and disinformation

Assess manipulated content and explore a transparent verification process.

Corporate security and digital exposure

Use open information for situational assessment and recognise social-engineering risks.

Format and practical value

Keynotes, expert talks and executive briefings: 20-90 minutes; classic keynotes 45-60 minutes. Panels, moderated contributions, Q&A and live demonstrations by agreement. For leaders, security teams, authorities, associations and conferences. Aim: assess risks and discuss next steps; no substitute for a case-specific assessment.

Berlin | Germany and international | German / English | On site, online or hybrid

Selected speaking experience: Magnet Germany Summit 2026; Digital Investigations Conference Zurich 2026 (joint keynote with Stefan Majchrzak); Industrieclub Sachsen 2026. Sources: nicolasglesel.de/en/references. GIAC GOSI certification; completed SANS SEC497 training.

VSW lecturer: Module 1.3 - Open Source Intelligence (OSINT), 17 March and 15 September 2027, Mainz (in person). Part of the organiser's "Koordinator:in - Betriebliche Ermittlungen & Interne Untersuchungen (IHK)" programme. IHK applies to VSW's programme, not to my own workshops. VSW seminar and registration.
